

PROGRAM PARTICIPATION

- All Consumers Energy residential customers are eligible to participate in this program. However, if you apply for a rebate on natural gas equipment, you must be a natural gas customer, and if you apply for a rebate on electric equipment, you must be an electric customer.
- For the equipment to qualify for rebates, it must be purchased from and installed by a participating contractor and must meet program eligibility guidelines.
- A list of participating contractors in your area is available at **ConsumersEnergy.com/Contractor**, or call **866-234-0445** for details. Your contractor will submit the rebate application for you after the work is performed.

Saving energy and money is easy with help from Consumers Energy.

RESIDENTIAL HEATING, COOLING AND
WATER HEATING PROGRAM

SAVE ON HEATING AND COOLING YOUR HOME.

UPGRADE YOUR HEATING, COOLING OR
WATER HEATING SYSTEM AND SAVE WITH
REBATES FROM CONSUMERS ENERGY.

Consumers Energy

Count on Us®

SAVE UP TO \$1,500 ON ENERGY-EFFICIENT EQUIPMENT AND SERVICES.

Whether you're purchasing a new heating, cooling or water heating system or taking care of the equipment you have, Consumers Energy wants to help you **increase your home's comfort and save!** Cash-back rebates help you offset the cost of home upgrades and enable you to choose the most efficient products for your home.

Save now with these rebates, and you'll keep saving, thanks to reduced energy costs.

Upgrade to energy-efficient equipment now, before your older equipment fails. Not ready to upgrade? Take advantage of our comprehensive tune-up program for furnaces, boilers and air conditioners. Properly maintained equipment runs more efficiently and lasts longer.

SAVING IS EASY!

1. Go to **ConsumersEnergy.com/Contractor** to find a participating contractor. In the Services Provided drop-down menu, select the check box for the service you would like.
2. Have your contractor help you select and install your new equipment, or perform a qualifying comprehensive tune-up.
3. Provide your contractor with your account information and signature. The contractor will submit the rebate application and supporting documentation for you.

Funding for rebates is limited and available on a first-come, first-served basis.
