

## HOME PERFORMANCE WITH ENERGY STAR® PROGRAM UPDATE

As we approach the halfway point of the program year, we want to thank you for your participation as a Home Performance with ENERGY STAR (HPwES) Trade Ally. Although mild winter weather resulted in lower program participation levels than we expected so far, we are looking forward to a busy summer and productive rest of the year to meet program goals.

Just to put your hard work into perspective: through June 15, participants in the HPwES program have saved 129 MWH of electricity and 8,650 MCF of natural gas. That's the equivalent of saving 16 homes' electricity use for one year, and it's enough natural gas to heat 93 homes. In addition to enjoying the benefits of saving energy and being more comfortable in their homes, our customers have also received rebates totaling \$318,000. All of these accomplishments have come while maintaining an average score of 8.8 out of 10 for overall customer satisfaction with the program.

The HPwES program will continue to operate at existing incentive levels through December 2017. Visit the [Trade Ally website](#) to find customer brochures, application forms and digital marketing materials, along with archived program updates in case you missed them the first time.
